

Green Environment Education European Network

GREEN NETWORK

Green Environment Education European Network

Webinar
10th Feb. 2015

Agenda

- About the project
 - our vision and mission
 - objectives
 - activities
- Our offer
- GREEN and your engagement

Our Vision

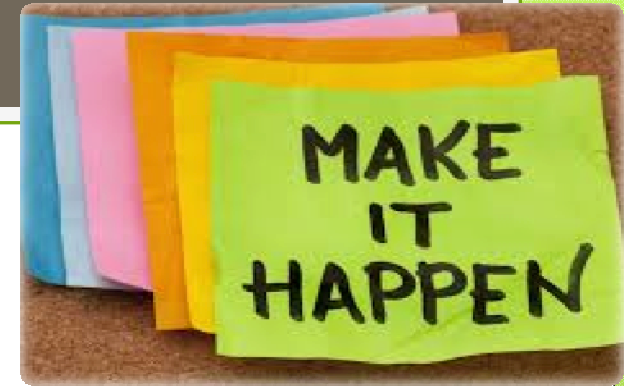

“Mitigation of global warming and promotion of climate change education”

Our mission:

- create an effective and sustainable network among schools and institutions
- make students and teachers aware of the need to take actions against global warming
- create and supply teachers with sources and materials on climate change education
- help teachers integrate climate change education into curriculum and extracurricular activities

Project objectives

Project activities

- ✓ Collect and exchange best practice models on climate change education (GREENHOUSE)
- ✓ Develop and implement a sound concept to tackle the issue on curricular and extracurricular level
- ✓ Launch the European GREEN Award
- ✓ Extend the European network involving relevant and interdisciplinary stakeholders

Our offers

- Networking platform with good practice examples
- Exchange platform
- Webinars / online conferences
- 1-day forums
- Regional networking events
- Training days
- Your profile on the GREEN website

Your profile on GREEN website

- Friends of GREEN

SEARCHING FOR PLANKTON

Personal profile page

I'm Paul, I teach chemistry and biology at Värmdö Gymnasium, an upper secondary school in Stockholm, Sweden.

I am happy to share my experiences in teaching about sustainability and climate change issues. But I'm just as interested in your experiences.
