

1st

Training Day of the **GREEN** Network

30.09.2014

CLIMATE CHANGE

How to approach the topic on school level?

Climate change represents one of the greatest environmental, social and economic threats facing the planet. Today's teenagers are likely to experience the effects of climate change much more than we do today. Schools can play a central role in providing young people with information and knowledge to help them understand climate change and assist their students with making more conscious consumer choices in terms of developing new attitudes towards what is appropriate and what is not.

How can we approach this complex topic at school level?

The GREEN Network invites you to attend its 1st training day on September 30th, 2014 at 09.30 h. During our training day we want to give examples and discuss an-swers to this question.

PROGRAMME
